

## Windermere Station Refurbishment

The provision of all necessary building, civils, mechanical and electrical works for the refurbishment and updating of the entire station facilities at Windermere Station.

During the works, the station building was closed entirely but remained fully operational by the provision of temporary office and waiting accommodation.

The works involved the stripping out of all existing station waiting rooms, toilets, staff mess facilities and ticketing/office areas.

The waiting room area was extended and refurbished to include CIS and heating & ventilation equipment. The ticketing area was made more secure and compliant to the DDA legislation.

All finishes were in line with the First Group Standards and in keeping with the Lake District requirements.

Quotes from SBS Architects: -

Gary Seed - 01/08/06:

*"I must say that I have been impressed by the level of professionalism that you and your team have demonstrated towards this project and look forward to the next one"*

Aaron Francis - 08/08/06:

*"I would like to take this opportunity to thank you and your sub-contractors for their assistance and commitment to the project. Your identified areas where costs could be saved and your continued willingness to accept additional work to the contract have provided the client with a building of high quality. I look forward to an opportunity when we can work together on another building project"*
