

VACANCY

Multi-Utility Designer (Electric, Gas and Water)

Due to our success in the industry and our plans to increase our market share and operations, we are looking for a highly motivated design professional to join our team to design, gas, water and electric infrastructures for new residential, industrial and commercial developments.

Based in our Kearsley office the design team is critical to our growth plan and the development of our business.

Ideally you should have a technical background within the utility sector. Experience of compiling project quotations/ offers is essential as is having experience of working for a Utilities infrastructure provider or independent connections provider.

As an experienced MU designer, you will be expected to liaise with clients/developers and take receipt of all relevant information associated with the order before taking the lead on the relevant most cost effective and efficient design solution.

This is an excellent opportunity to join an expanding and supportive business who have an excellent reputation and will offer the successful candidate a challenging and rewarding position.

If you are interested in applying for this position please email your CV to recruitment@bethell.co.uk
