

Multi Utility Project Managers

Manchester

Salary dependent on experience + excellent benefits package

Based on a 150 year heritage, Bethell Utility Services (part of Bethell Construction) is an Independent Connections provider (ICP), based in the North West of England which delivers an end to end design and build multi utility service to new residential, industrial and commercial developments.

Following the award of new contracts, we are looking for exceptional candidates to drive the growth of our business within the multi utility sector.

The successful candidate will be responsible for multi-lay gangs carrying out installation of water and gas mains and services on new build sites. High standard of workmanship and professionalism will be expected as well as full compliance with site health and safety.

Ideally you will have be experienced of managing multiple mains / service laying new connections projects in accordance with quality standards and safety procedures.

Relevant experience working in a similar role is essential, along with a full UK driving licence and a passion for customer service excellence. Although not essential, you should also ideally have the following:

- Gas and Water qualifications (NCO)
- SCO 1,2 and 5
- IOSH qualified
- ENW / IDNO authorisations

This is an excellent opportunity to join an expanding and supportive business who have an excellent reputation and will offer the successful candidate a challenging and rewarding position.
